

Press Release

Salach, 3 November 2005

Cooperation between PRIAMUS and Dr. Gierth Ingenieurgesellschaft mbH

Priamus System Technologies GmbH and Dr. Gierth Ingenieurgesellschaft mbH, Würselen, signed a distribution agreement.

From now on Dr. Gierth Ingenieurgesellschaft mbH will distribute all Priamus System Technologies products, such as cavity pressure sensors which stand out for its technical and cost advantages, or the automatic hotrunner balancing system Priamus Fill. Thus the company is using in its own systems the "eDAQTM" system, which was developed by Priamus. This device offers countless alternatives for real time control and monitoring in the injection molding process. In addition, the High Speed Ethernet data transfer ensures a fast data acquisition.

This cooperation unites and complements two innovative companies in the field of process optimizing and quality assurance in the injection molding process.

The company Dr. Gierth was established in 1991 and deals ever since with process optimizing and quality assurance especially in injection molding. The company offers services in process engineering as well as self developed soft- and hardware for acquisition and evaluation of process data. The goal is a 100 % quality monitoring, quality control and quality documentation.

Priamus System Technologies GmbH was established in 2001 and is a subsidiary of Priamus System Technologies AG, Schaffhausen / Switzerland. The group has worldwide 25 employees and offers products such as cavity pressure sensors, cavity temperature sensors as well as entire control and monitoring systems for quality assurance in the injection molding process. The systems can not only monitor the injection molding process but also control it intelligently.
